

Quarterly Report 30 June 2023

Commentary and analysis

Market overview

Global market sentiment has generally improved in 2023 as global economic growth has been stronger than expected and inflationary fears have cooled. The two dominant themes driving markets this quarter were the outperformance of US Tech and China's reopening which has been more muted than hoped. Technological gains, in particular generative artificial intelligence (AI), has fascinated the market this year. NVIDIA, a primary supplier of AI chips, has surged 189% YTD and on average the top 7 US-listed tech stocks have risen over 70% YTD while the remaining 493 stocks in the S&P 500 have essentially done nothing.

In the US the Fed hiked rates by 25bps in May before pausing in June. However, while they kept rates on hold in June, they have maintained their stance that they will raise rates when necessary and the market is expecting a further hike in coming months. Europe, Canada, and England central banks surprised on the hawkish side. The Bank of England delivered 75 bps of hikes in the quarter and markets now price rates in the UK rising to over 6% from the current 5%. In contrast, China has been bucking the trend by cutting rates as their inflation rate is still relatively low and economic activity has been subdued.

Despite the rising interest rates globally Global equities performed well in local currency as well as in rands, helped by the 5.9% weakness of the rand relative to the US dollar. The MSCI ACWI IMI was up (in rand) 12.3%.

Asset class performance (%)

Local	Q2 2023	1 year	3 years	5 years	International	Q2 2023	1 year	3 years	5 years

Portfolio review

The fund outperformed its benchmark by 70bps over the quarter as well as outperforming its peers by 1.6%.

The biggest detractor was IT. In this regard an underweight allocation plus security selection within the sector hurt relative returns. By contrast an underweight to Real Estate as well as stock picking added alpha. Similarly, stock selection within the broader financials sector added alpha. On a stock level the biggest detractor over Q2 was an underweight to NVIDIA, which jumped over 50%. This was partially offset by overweight to Samsung and Entegris, which also benefited from AI related demand. An underweight to mega cap growth names like Apple and Tesla detracted. Conversely, some of our hyper growth holdings such as Shopify as well as Meta helped.

Looking at the underlying managers, AB, Veritas and Hosking lagged while Sands, Arrowstreet and Sanders outperformed. Veritas struggled due to their lower beta in a rising market while Hosking's small cap and emerging market bias detracted. The operating environment suited Sands growth orientation and the semiconductor rally was helpful for the Sanders mandate that has a sizeable allocation to the theme.

Portfolio positioning and outlook

Although we have had a good quarter of performance the rate hiking cycles of central banks are not yet over, and global inflation has yet to recede within target bands. The risk of recession is still looming but there is hope as growth is expected to return to more normal levels in 2024.

The fund has a well-diversified basket of managers with varying strategies that should provide competitive returns over time. Our managers are constantly looking for ideas to improve their portfolios to maintain excellent returns over the long term.

The commentary gives the views of the portfolio manager at the time of writing. Any forecasts or commentary included in this document are not guaranteed to occur.

Change in allocation of the fund over the quarter

Asset type	Q2 2023	Q1 2023	Change
Domestic Cash & Mny Mkt	2.94	3.15	-0.21
Domestic Equity	1.03	1.03	0.00
Foreign Equity	93.65	93.45	0.21
Foreign Fixed Interest	0.02	0.02	0.00
Foreign Funds	0.08	0.08	0.00
Foreign Other	0.06	0.06	0.00
Foreign Property	2.21	2.21	0.00

The portfolio adhered to its portfolio objective over the quarter.

Fund classes

Class	Type	TER	Price (cpu)	Units	NAV (Rand)
B1	Retail	1.33	589.46	179,839,582.01	1,060,084,194.33

All Price, Units and NAV data as at 30 June 2023.

Units - amount of participatory interests (units) in issue in relevant class.

TER - 1 Year Total Expense Ratio (%) including VAT as at 31/03/2023.

Disclosures

Information to be considered before investing

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The STANLIB Multi-Manager Global Equity Feeder Fund is a portfolio of the STANLIB Collective Investment Scheme (the Scheme). The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The Manager is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The Manager is a member of the Liberty Group of Companies. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager. The trustee of the Scheme is Standard Chartered Bank.

This portfolio is permitted to invest in foreign securities. Should the portfolio include any foreign securities these could expose the portfolio to any of the following risks: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

This portfolio is a Feeder Fund portfolio. A Feeder Fund portfolio is a portfolio that invests in a single portfolio of a collective investment scheme, that levies its own charges, which could result in a higher fee structure for the Feeder Fund.

Unit price – how it works

Prices are calculated and published on each working day, these prices are available on the Manager's website (www.stanlib.com) and in South African printed news media. This portfolio is valued at 17h00. Forward pricing is used. Investments and repurchases will receive the price of the same day if received prior to 15h00.

The payment of withdrawals may be delayed in extraordinary circumstances, when the Manager with the consent of the Fund trustees deems this to be in the interest of all Fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the Fund. When the suspension of trading relates to only certain assets held by the Fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued but, will delay liquidity on the affected portion of the Fund. If the Fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force the Manager to sell the underlying investments in a manner that may have a negative impact on remaining investors of the Fund.

Performance information

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 30 June 2023. Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager. Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Total Expense Ratio (TER) and Transaction Costs (TC) = Total Investment Charge (TIC) and other fees

The TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER is a measure of the actual expenses incurred by the fund over a one and three-year period (annualised). This includes the TER charged by any underlying fund(s) held as part of this Fund. A high TER does not necessarily imply a poor return nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TER's.

Transaction costs are disclosed separately. Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The sum of the TER and Transaction Costs is shown as the Total Investment Charge (TIC).

Annual management fee: The Fund charges a fixed annual management fee (i.e. fee class) as a percentage of the assets under management, to ensure a simple and understandable fee structure. The Fund invests primarily in segregated mandates but may also invest in other unit trusts i.e. "Underlying Fund Fees", which are included in the Total Expense Ratio (TER). The annual management fee is accrued daily and paid on a monthly basis.

Advice fees: If an investor appoints an adviser, advice fees are contracted directly between the investor and the adviser. The Manager will facilitate the collection of advice fees only upon receiving an investor's instruction to do so. Initial advice fees up to a maximum of 3.45% are collected prior to units being purchased and ongoing advice fees up to a maximum of 1.15% are collected monthly through the redemption of units held by an investor in the Fund. An investor may cancel the instruction to facilitate the payment of advice fees at any time.

STANLIB Multi-Manager does not provide financial advice

The investments of this portfolio are managed, on behalf of the Manager, by STANLIB Multi-Manager a division of STANLIB Asset Management (Pty) Ltd, an authorised financial services provider (FSP), FSP No. 719, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002.

This document is not advice, as defined under FAIS. Please be advised that there may be representatives acting under supervision.
