FUND INFORMATION TO BE CONSIDERED BEFORE INVESTING

The STANLIB Multi-Manager Diversified Equity Fund of Funds (FoF) should be considered a medium to long term investment. A FoF invests in other collective investment schemes (CISs), which levy their own charges and which could result in a higher fee structure for the FoF. The value of units (participatory interests) may go down as well as up and past performance is not necessarily a guide to future performance. Where foreign securities are included in the FoF it may as a result be exposed to macroeconomic, political, tax, settlement and illiquidity risks factors that may be different to similar investments in the South African market. The FoF is traded at ruling prices using forward pricing, and can engage in borrowing up to 10% of the market value of the portfolio to bridge insufficient liquidity as a result of the redemptions and may engage in scrip lending. A schedule of fees, charges and maximum commissions is available on request from STANLIB Collective Investments (RF) Pty Limited (the Manco). Commission and incentives may be paid and if so, would be included in the overall costs of the Fund. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Liberty is a full member of the Association for Savings and Investments South Africa (ASISA). The Manco is a member of the Liberty Group of Companies. The manager does not provide guarantee in respect of capital or return of portfolio.

PERFORMANCE DISCLOSURE

Performance is calculated by STANLIB Multi-Manager (Pty) Ltd as at month end for a lump sum investment using net asset value (NAV) prices with income reinvestments done on the ex-dividend date. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs including manager fees, and trading costs incurred within the Fund. Note that individual investor performance may differ as a result of actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the weighted average compound growth rate over the performance period measured. Past investment returns are not indicative of future returns and no guarantee is provided with respect to capital or return of the Fund.
